About Product

Signage Circus offers the broadest range of scrolling sizes for all kind of applications. Our units are designed to give maximum flexibility and practicality to quarantee efficient operation combined with a premium return of investment. . They are actually lightboxes that have the ability to scroll 6 posters. The scrolling Billboard Light Box Display (Image Scroller)is an innovative, state-of-the-art backlit advertising display medium. The advertising impact is intensifies by the vibrant backlighting, brilliant colors, digitally crisp images, and the continuous motion of the Display. They feature the ability to continuously scroll through a series of high-resolution high-impact full-color posters.

Because of the back-lit advertising poster images become more realistic compared to conventional billboards with glued paper.All posters are fixed on a roll. A special technology allows changing single images. The presentation of the posters during operation is trouble-free and smooth and poster movement creates attention.

Features:

♦ Non-Messy Advanced Mechanism
♦ World Most Advanced User Friendly Electronic Digital Controller
